Summary

Front-End Developer with 3+ years of experience building enterprise dashboards, admin panels, and responsive web applications. Specialized in Angular with hands-on expertise in TypeScript, RxJS, Reactive Forms, Angular Material and REST API integration. Experienced in the React ecosystem (Redux Toolkit, React Query, Context API) and Tailwind CSS for modern UI development. Proven ability to deliver scalable, maintainable, and high-performance web applications while collaborating effectively with remote and cross-functional teams.

Work Experience

Front-End Developer (Part-Time/Remote)

Maroon Software Development Company

March 2026 to Present

- Refactored legacy Angular modules to improve code readability and maintainability.
- Diagnosed and resolved UI and logic bugs, enhancing application stability.
- Integrated REST APIs using Swagger and Postman.

Front-End Developer (Full-Time/Remote)

Maroon Software Development Company

March 2025 to March 2026

- Built scalable Angular components with TypeScript, following modular architecture and coding standards.
- Integrated RESTful APIs using Angular's HttpClient with RxJS, managing complex asynchronous data streams.
- Implemented pagination for large datasets and role-based authorization to manage user access.
- Improved UI performance by implementing lazy loading, OnPush change detection, and memoization to reduce unnecessary re-renders.
- Developed interactive analytical dashboards and enterprise admin panels with ECharts for rich data visualization.
- Delivered full multi-language support (Persian/English) across the application using ngx-translate.
- Built an interactive event scheduling interface using FullCalendar library, and integrated jalali-moment for Persian (Jalali) calendar date conversion and localization.
- Built complex reactive forms with dynamic validations and nested form groups for enterprise data entry.

Skills

- Angular, Angular Material, RxJS, ngx-translate
- React, React Query, React Hook Form, Redux Toolkit
- TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
- REST API, Swagger, Postman
- Git, GitHub, Jira, Figma, Clockify, VsCode
- FullCalendar, ECharts, jalali-moment
- Agile Methodologies

Courses & Certificates

Front-End Bootcamp

Bootostart Company

March 2024 to Dec 2024

- Built React applications using, Tailwind CSS, React Query and React Hook Form.
- Integrated REST APIs (Swagger) using Axios.
- Worked with Figma designs and practiced Git workflow.

Education

M.Sc. IT - Network Computers

Urmia University | 2018 to 2022

B.Sc. Computer Engineering (Software Engineering)

Guilan University | 2012 to 2016

Projects

Freelance Marketplace Platform (Personal Project)

- Built a multi-role marketplace (Admin, Owner, Freelancer) using React, React Hook Form, and React Query.
- Implemented mobile OTP authentication for secure login and registration.
- Features: Owners create projects, freelancers send requests, Owners accept/reject, and admin approves users, filtering by category, status, and creation date
- Tech stack: React, React Query, React Hook Form, REST API, Tailwind Css
- [GitHub Project Link](#)

Rick and Morty (Personal Project)

- Built a character list app with search & favorites using React, Tailwind CSS, Axios (RickandMortyAPI), and Context for state.
- Tech stack: React, Tailwind CSS, Axios
- [GitHub Project Link](#)

Shopping Web (Personal Project)

- Developed an e-commerce product browser with filtering, favorites, and shopping cart using React, Tailwind, and Redux Toolkit
- Used Axios for API calls (FakeStoreAPI) and combined Context + Reducer with Redux-Toolkit for state management.
- Tech stack: React, Tailwind CSS, Axios, Redux Toolkit
- [GitHub Project Link](#)
